EXAMINER'S ACTION

Art Unit: 3736

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, 20-30, 32-44, and 47-50, drawn to an interventional device, classified in class 607, subclass 88.
- II. Claims 18 and 19, drawn to a method for generating light inside the body, classified in class 604, subclass 20.
- III. Claims 31 and 51, drawn to a method for generating modular photonic energy, classified in class 600, subclass 101.
- IV. Claims 45 and 46, drawn to a method for performing spectral analysis, classified in class 600, subclass 475.

The inventions are distinct, each from the other because:

Inventions each of II, III, and VI and 1 are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the device could perform any of the methods.

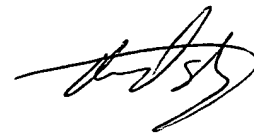

Inventions II, III and IV are separate and distinct methods.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3736

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to David Shay at telephone number (703) 308-2215.
